

INSTAALARM

INSTANT PANIC ALARM

INSTALLATION GUIDE

DELTAMINDS
THINKING DIFFERENTLY

1

SWITCH ON THE ALARM

Switch on the InstaAlarm. The **Red LED** on the device should be on.

2

CONNECT TO THE ALARM DEVICE

From your phone/computer join the InstaAlarm wi-fi network. The password is 12345678.

3

CONFIGURE WI-FI

A captive portal config page will appear. Choose the wi-fi network you want to use with the device and also provide the **alarm id** printed at the back of your alarm device. Save the configuration.

4

CHECK CONNECTION

Restart the InstaAlarm device. Once you are connected to the network, the **Green LED** should be on.

5

CONFIGURE THE MOBILE APP

Install the **InstaAlarm** mobile app. Go the **Settings** page of the app and provide the **alarm ID** printed at the back of your InstaAlarm device and **Save**.

6

TEST CONNECTION

Once the correct **Alarm ID** is provided, the app should display **Your Alarm is Connected** message.

7

CONTROL YOUR ALARM

Now, you can use the **Control Switch** in the app to turn on and off your InstaAlarm. The **Yellow LED** of the InstaAlarm will glow when the ON command arrives.

8

MANUAL OPERATION

You can also activate the Alarm by pressing the manual switch continuously for more than 2 seconds.
